

Wendy Trattner

EDUCATION

2017-2021

Massachusetts Institute of Technology

B.S. Mechanical Engineering | GPA: 4.7/5

with concentration in Creative Writing

Relevant coursework:

- Mechanics & Materials
- Design & Manufacturing I & II
- Dynamics & Controls I & II
- Thermal-Fluids Engineering
- Computation in Python, Matlab
- Full Stack Web Development w/ ReactJS
- The Art & Science of Negotiation
- Entrepreneurship in Engineering

WORK EXPERIENCE

'24-Present

Art and Canvas Combat *Scottsdale, AZ*

Founder & Creative Director

Grew Instagram from 0 to 20k followers. Grew profitable art business + brand to 5 figures. Founded Canvas Combat, a live art competition brand, securing sponsorship and scaling marketing from zero.

2023-'24

unspun *San Francisco & Emeryville, CA*

Mechanical Engineer

Led design and manufacturing of innovative 3D weaving machine systems. Owned concept development, prototyping, and production to advance zero-waste, circular fashion manufacturing. Collaborated with brand and product teams to deliver live demos, fashion brand collaborations, and investor showcases.

2022

Lunar Energy *Mountain View, CA*

Mechanical Design Engineer

Owned high volume mechanical parts from concept through production, including manufacturing line setup, training, and assembly instructions. Designed for sheet metal bending, inj. molding, die casting, 3D printing.

2021

Gradient *San Francisco, CA*

Mechanical Engineer

Designed performance-enhancing components for low greenhouse gas emissions heat pump product. Led several verification & reliability test efforts which informed key product decisions.

2020

Embark Trucks *San Francisco, CA*

Mechanical Engineer

Designed autonomous truck components. Led mechanical analysis and implemented company's first design requirements. Onboarded team to Solidworks PDM. Proposed and developed partnerships strategy with C-suite. Defined growth model with Chief of Staff.

2019

Lyft Level 5 *Palo Alto, CA*

Mechanical Analysis & Reliability Engineering Intern

Designed, analyzed, and tested retrofit camera mounts to minimize sensor vibration. Performed acoustic testing and created company-wide noise requirements and abatement methods for new generation of autonomous vehicles.

MORE ABOUT ME

Recreational art, content creation, graphic design, golf, DJing
